

DOOR ACCESS SOLUTIONS

Automatic Door

GILGEN
DOOR SYSTEMS

Sliding Door

SL Series – One system for all the complexity levels and customer applications. Three drive unit types in different construction heights, consistent and versatile across various profile systems. All components are universally applicable for drive units, profile systems and accessories.

Burglar resistant sliding door RC2/3

In combination with PSXP profile the most versatile solution in the market. Up to 180kg per panel, available with Interlocking mechanism achieving RC2/3 certification.

Swing Door

Two Drive mechanism – many possible applications. The Gilgen FD Series Swing door drive unit is highly consistent when it comes to performance, long service life and quiet operation. From light-weight internal doors to heavier external doors designed to withstand higher windloads – the Gilgen FD Series is always the right choice!

Folding Door

A lack of space need not rule out convenience. A folding door saves space while providing easy opening and closing. Automatic folding doors from Gilgen are ideal for corridors and passageways where space is limited.

Easy to install and with high durability and long life-cycled

Barrier Free Solution

“Barrier Free” ensures a hygienic and trouble free access to public areas and facilities. It helps to ease the way for a smooth and efficient operation be it for the Public or in Back of House areas. Public Toilets, particularly for people with disabilities, are complex systems which need to comply with a high demand for safety, reliability and operational ease. AUB is one of the key supplier of the Door-Automation for HKIA, MTRC and several other major public institutional facilities.

Window & Entrance

air-lux® 100% Impermeability with air-seal technology High-performance Sliding Window

Thanks to air-lux's patented sealing system, compromises are a thing of the past when it comes to sliding windows. air-lux guarantees 100% impermeability with the same excellent running characteristics of the sliding leaves up to 18m² and 1800 kg.

Main Entrance Swing Door

One door closes, another one opens - quietly, elegantly and flawlessly. Silber designer doors from Austria impress with their uniqueness and perfection. Customized design doors in wood to meet exclusive demands and design intent. Silber doors are meeting highest requirements in attack resistance up to RC4 to EN Standards.

SiLATEC Attack Resistant Glass

Silatec Security Glass is a laminated glass consisting of several highly transparent and highly resistant materials.

Silatec Security Glass has distinct features and advantages over conventional armored glass; it is thinner, lighter, neutral in color and provides a high level of UV protection.

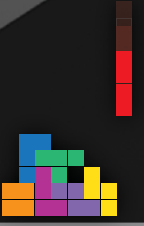

Silatec is offering Burglar-proof and Bullet-proof glazing versions, as well as Private Protection in highest grading; tested and certified to EN Standards.

AUR E-FOLD Bi-Fold Door

E-Fold Manual Doors provide smooth and easy to operate securing large openings in Public, Commercial and Private projects. They are tested to withstand large numbers of cycles and weatherproof in terms of Air Infiltration, Water and Wind resistance. The premium door hardware and stainless steel fittings ensure a secure closing of the door.

Hardware & Locks

Ironmongery

Accessories:

- Great Variety

* A comprehensive portfolio of tested and certified Door Hardware and Cylinder Systems for Residential & Commercial projects.

Outdoor Hardware

Our Gate Closers and Lock complete our range of high quality fence and gate hardware. Their closing speed remains unaltered during changing weather conditions thanks to the patented, weather independent, hydraulic damping. Closing speed and closing force are both adjustable by means of adjusting screws and a final snap can be set.

Industrial Door

EFAFLEX High-Speed Door

The unrivalled Original. The perfection of the door blade guidance in the EFAFLEX spiral is still unique. Only this design brings the highest opening speeds of up to 4m/s, durability and effectiveness together so well. The door blade is not wound onto a shaft, but rather is held apart to save space by the spiral-shaped guide. EFAFLEX invented this functional principle and has continuously developed it – with unique advantages for you. Main application include - High Security, Car Park, Cold Storage and Logistic.

High - Security & Typhoon Shutter

Established in 1946, Hart is the oldest British manufacturer of Security Roller shutters. The range of products includes Security, ATEX and Typhoon protection roller shutters. Hart designs and manufactures industrial door systems for a broad range of applications and business sectors, often requiring bespoke solutions.

SÄLZER High - Security Door & Window

Starting from forced entry resistance with bullet, blast and fire resistance right up to perimeter security with barriers and bollards. Key application - Main Entrance, Interior doors in aluminium and steel for Residential, Commercial and Institutional projects. Saelzer is active worldwide and develops tailored building security concepts, that are efficient, economical and attractive in design.

WE Folding Shutter

Folding Shutters are controlled by pantograph systems, making them smooth and easy to operate. Excellent for use in extreme weather conditions and suitable for openings of a height of up to 8m meters, with large widths. Folding Shutters are particularly suited for Fire & Emergency Vehicle Stations, Warehouses and other Commercial and Industrial buildings.

Access Control

Biometric Access Control

TBS is the specialists behind the world's largest security integrators and countless resellers – providing biometric expertise, products and solutions in Access Control and Time & Attendance.

TBS offers a comprehensive choice of 3D and 2D Biometric Access Control Terminals. Specialized Applications for Small Enterprise Office, Villa or Serviced Apartment; supported by its own Bio-manager or fully integrated in to large Corporate Software Solutions.

ASSA ABLOY Hotel Access Control

Integrated Access Control Solution for the Hospitality as well as Service Apartments, Shared Workplaces, Office or a variety of other Commercial sectors.

TESA is using a single platform to manage all related systems including the locks, wall readers, cylinders, using Wireless Online, BLE, RFID. Magnetic or Dual technologies required to manage any Access points.

IP Video Door Station

Answer your door. Anywhere.

DoorBird is the smart solution for your house or apartment entrance. Simply connect the IP Video Door Station to the smartphone and talk to your visitor, get notifications – wherever you are. Stand-alone or integrated with 3rd party Smart Home solutions.

ojmar® Intelligent Locking Systems

Electronic locks for lockers with a whole range of next generation products, designed for all types of residential and commercial facilities adaptable to various customer demands. Designed and manufactured in Europe.

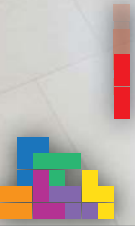

OTA Smart Living is created by AUB in cooperation with iSignage

OTA aims to provide Online and Integrated Booking Systems with simple and user-friendly UI and dashboard design to guide users to check booking status and complete a booking request. The process flow can be tailor-made to particular requirements.

Security Gate

CAMBAUM

Sensor Barrier Series

The Series of Sensor Barrier are designed to meet the grand vision of the owners when creating the personality of the Main Entrance, Podium or Lift Lobby of an office tower. Customization of the appearance thru specialized finishes as well as functionalities with distinct features is our strength. The Sensor Barrier can interface with any Access Control systems and People Flow management software and their respective readers and indicators.

Personal Interlock Series

Top security is not just a matter of checking whether a user has authorization to enter. The highest degree of separation and authorization checking must be achieved. Electronically monitored Security interlocks meet the highest demands and provide optimal protection for sensitive building areas.

Security Revolving Series

Secure areas require a reliable system for identifying and separating authorized persons. As these areas are usually representative of the building, a secure but at the same time transparent access solution is preferred.
