

One small change that changes everything

ASSA ABLOY

Style, intelligence and robustness
come together in the new SMARTair®
knob cylinder

The global leader in
door opening solutions

Modern security outside and in

The new SMARTair knob cylinder: a door device improved in every way. It is more resistant to attack. It comes in more finishes and colours, upgrading aesthetics and functionality in equal

measure. Suitable for any door, it quickly upgrades your existing mechanical cylinder to an access controlled cylinder. Without any drilling.

Simple to install, converting any door into an access control point just by replacing its existing mechanical cylinder.

The EURO profile knob cylinder offers options like double electronic-electronic, double electronic-mechanic, double electronic-button and single cylinder to ensure 100% compatibility with market needs. Also available in Scandinavian, Finish, ANSI and Australian profiles.

SMARTair Knob Cylinders have been analyzed in terms of Durability EN 15684 Class 6 certificate.

RFID reader with LED (blue/red) for different warning signals.

Tailored to every type of door or access point (wooden doors, aluminium-profile doors, glass doors).

Exterior usage category: IP56.

Wireless and battery-powered knob cylinder (60.000 cycles).

Modern, elegant design with a choice of finishes to fit any building style.

Your environment, your knob cylinder

Built to secure offices and smart environments where design and technology are inseparable.

SMARTair's wireless, battery-powered electronic knob cylinder is ideal for offices, business headquarters, conference and meeting rooms. Upgrading to a knob cylinder is simple: just replace your existing mechanical cylinder with the new device. No complex installation or drilling stands between you and safe, reliable, flexible SMARTair access control.

SMARTair is an established, trusted access control system, easy to customise to offer any degree of sophistication you need. The new knob cylinder works with every SMARTair management option. Choose between wireless online, update on card, offline or standalone. Or combine more than one at the same site.

With the new SMARTair knob cylinder, staff, valuable data and other company assets are protected from unauthorised access.

Practical and convenient

- The knob cylinder is ideal for any workplace where change is a constant.
- Simple and practical for employees, the device also guarantees high levels of security and access control.
- Is perfect for controlling different spaces with different levels of mobility.
- The new knob cylinder easily accommodates employees who move offices, or to company headquarters in another city or country.

Openow Compatible with all forms of intelligence

Welcome to the future of access control. Our knob cylinder also offers a new way to open your doors — using the Openow mobile app. Site users no longer carry separate credentials, just their smartphone. Security and facility managers boost their efficiency, sending, cancelling and modifying virtual keys when they choose.
