

SMARTAIR[®]
Your Access. Your Control.

Openow™: The intelligent mobile solution for access control

ASSA ABLOY

Experience a safer
and more open world

Openow meets everyone's needs

Send virtual keys to any smartphone, and open doors securely, with the Openow mobile solution.

CEO

Project the right image for your business with this fast, secure way to manage access credentials.

Employee

Enjoy the convenience of managing everything on your smartphone, without ever needing to visit a collection point for your access card or credential.

Security Manager

Work fast by sending and revoking virtual keys, changing access plans on the go and receiving all door events in real time.

"I'm able to immediately send, revoke or update virtual keys from anywhere, to any smartphone and with maximum security. And with the door history I receive with each smartphone opening, I have the entire building under control."

John Kennet
Security Manager

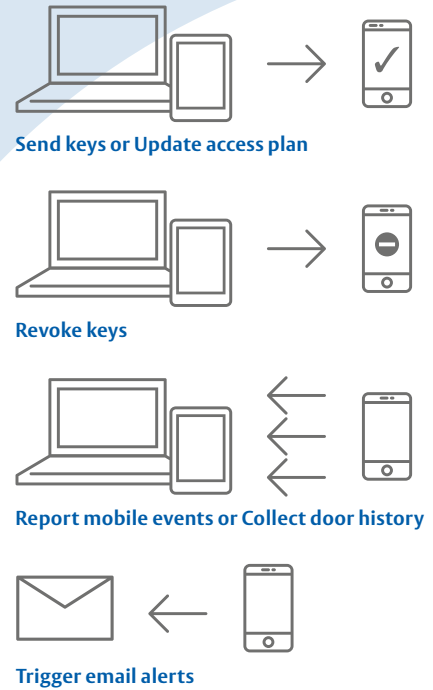

"Openow is the perfect solution for my business. I don't need to buy physical credentials yet I am offering a fast and convenient solution to my employees."

Mia Cohen
CEO

"I can instantly gain access using my mobile phone, with no need to visit reception, wait around or carry a physical credential."

Clyde Lee
Employee

Using Openow mobile keys makes your business more efficient

Functionality for security managers

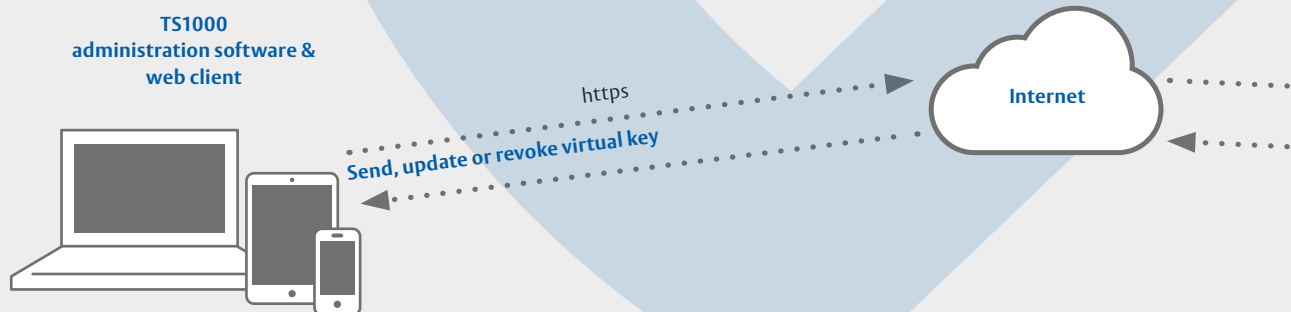

Security managers instantly send, revoke or update Openow virtual keys directly from the TS1000 software or web browser. Virtual keys are securely deployed over-the-air to anywhere in the world. In addition, security managers can update the access plan, receive mobile events and collect door history anytime a user opens a door with Openow. Trigger alerts can also be set up to be informed of events like low battery, access denied or out of time zone.

Secure data transmission for all communications is ensured by these industry protocols:

Security protocols

- Encrypted https secure connection between the TS1000 software and every user's smartphone.
- AES128 with diversified keys encryption for all communications between smartphone and door devices.

Multiple keys

Door opening

No physical key

Functionality for users

For users it's easy to take advantage of this new mobile access solution. Just download the app and receive your key immediately, regardless of where you are.

It allows to hold as many virtual keys as needed. It does not matter how far you go. This feature is especially designed for professionals working in different locations.

A leap forward for convenience in every business

Openow is the perfect solution for facilities with people on the move or a high volume of visitors and subcontractors. It is built for businesses where third-party contractors are always on-site, and companies whose staff travel regularly to global subsidiaries.

Queues at the reception desk, temporary access for cleaning staff... The key to solving these issues in hospitals, universities, museums, offices, multinationals, co-working spaces and ministries is Openow from SMARTair.

Healthcare

Provide doctors, nurses, medical staff, contractors, temporary personnel and service companies with virtual keys, without creating resource bottlenecks around a single issuing point.

Education

Students and teaching staff enjoy the benefits and convenience of mobile technology, with keys on their smartphones and no need to collect them from reception or admin offices.

Commercial Spaces

Access points to areas with high footfall – such as collaborative spaces or co-working areas – no longer need a 24/7 reception desk to hand credentials to visitors.

Public Institutions and Buildings

For the hundreds of visitors who arrive every day and move around the site, Openow from SMARTair is the mobile-ready solution you have been waiting for.

Multi Residence

Designed for environments that have a high daily flow of people and where security is paramount, Openow brings these innovations to the domestic sphere.

Openow makes your SMARTair access control system mobile

SMARTair is a powerful access control system, simple to install, configure, administer and maintain. It adapts to any size of building and perfectly integrates with your existing door security.

And now, with the Openow solution, available for iOS and Android, you can convert your smartphone into a key. Users conveniently open doors with their smartphone while it provides facility managers with great flexibility in handling

virtual keys and real time knowledge of what's happening at the doors.

Our Openow mobile solution is suitable for both new and existing SMARTair installations, as only few steps upgrade your site to make it mobile ready.

SMARTair includes:

Whatever your premises and needs, SMARTair has the right solution:

Software

The SMARTair TS1000 administration software is intuitive and can be accessed from any device (PC, tablet or mobile phone) with a standard browser.

Credentials

Openow, the App for smartphones, is now available. Mobile solution can be combined with other existing credentials (cards, bracelets, tags) in the same installation.

Knob cylinders

For management and admin doors, knob cylinders are the right choice.

Escutcheons

Robust, slim design escutcheons, ideal to equip any type of exterior or interior door or access point (wooden doors, aluminium-profile doors, fire resistant doors and escape routes).

Wall readers

For entrance doors, car parks, lifts and common areas with high traffic flows, wall readers are the best option.
